Warsaw University of Technology

COURSE OFFERED IN THE DOCTORAL SCHOOL

Code of the course		4606-ES-00000BH-0127		7 Name of the course		Polish	Układy nawigacyjne		
						English	Navigation systems		
Type of the course Specialized subj			ect						
Course coordinator	Course coordinator Prof dr hab. inż. Janusz Narkiewicz								
Fac Implementing unit		Faculty of Power and Aeronautical Engineering		Scie	entific discipline / disciplines*	Mechanical engineering /Automation Electronics			
Level of education		PhD stu	udies		Semester		summer		
Language of the course English									
Type of assessment:		Final mark based on test, project and presentations qualities		N	lumber of hours in a semester	30	ECTS credits		3
Minimum number of participants		10		Ν	Aaximum number of participants	20	Available for students (BSc, MSc)		Yes
Type of classes		Lecture		è	Auditory classes	Project classes	Laboratory		Seminar
Number of hours		in a week	3 weeks hours and week 1 ho	11		Individual consultations compulsory		pr (p	oject esentations resence mpulsatory)
	in	in a semester 20				6			4

* does not apply to the Researcher's Workshop

1. Prerequisites

Fundamental knowledge and skills in mathematic (matrix calculus, ordinary differential equations, stochastic methods) and in mechanics (dynamics).

2. Course objectives

To comprehend models and mathematical methods used in navigation and attitude systems and their applications to various mobile platforms (land, water, air, space).

3. Course content (separate for each type of classes)

Lecture

Methods for position and attitude determination. Architectures of the position and attitude systems. Sensors and their errors. Accelerometers. Gyroscopes. Earth shape and systems of coordinates. Earth gravity and gravity sensors. GNSS. Inertial Navigation Systems. INS/GPS integration.

Supervised project: to develop a model and an algorithm for selected navigation / attitude system.

Laboratory

4. Learning outcomes					
	Learning outcomes description	Reference to the learning outcomes of the WUT DS	Learning outcomes verification methods*		
Knowledge					
W01	She / he knows the background of the methods, sensors, errors of navigation and attitude systems, sensor integration and data fusion.	SD-W3	Test		
	Skills				

Warsaw University of Technology

She / he is capable to develop mathematical andU01simulation model of the system containing various sensors and various data processing algorithms.		SD-U1	Report evaluation			
	Social competences					
K01	Clear and comprehensive communication and presentation of own achievements.	SD-K1, SD-K4	Report evaluation Presentation evaluation			

*Allowed learning outcomes verification methods: exam; oral exam; written test; oral test; project evaluation; report evaluation; presentation evaluation; active participation during classes; homework; tests

5. Assessment criteria

The sum of partial achievements

Total mark= Test*0,4+Project results and report*0,4+Presentation (seminar)*0,2

6. Literature

<u>Background</u>

[1] Grewal M.S., Weill L.R., Andrews A.P., "Global Positioning Systems, Inertial Navigation and Integration", John Willey & Sons, 2000.

[2] Lawrence A., "Modern Inertial Technology. Navigation, Guidance, and Control". Springer-Verlag, 1998
[3] Rogers R.M., "Applied Mathematics in Integrated Navigation Systems", AIAA Series, 2000.
web site materials

Suplementary

Literature will be given for each lecture based on relative chapter of the text / monography book. Books should be available in university or faculty library. Specialized literature references will be given for the projects.

7. PhD student's workload necessary to achieve the learning outcomes**				
No.	Description	Number of hours		
1	Hours of scheduled instruction given by the academic teacher in the classroom	30		
2	Hours of consultations with the academic teacher, exams, tests, etc.	5		
3	Amount of time devoted to the preparation for classes, preparation of presentations, reports, projects, homework	30		
4	Amount of time devoted to the preparation for exams, test, assessments	10		
	75			
	3			
** 1 EC	** 1 ECTS = 25-30 hours of the PhD students work (2 ECTS = 60 hours; 4 ECTS = 110 hours, etc.)
